Luis-Miguel López-Santamaría

Irapuato, Guanajuato

+52 (462) 108 2274

luis_miguel@outlook.com

Age: 27 years

PROFILE

A motivated young data scientist focused on everything that is involved, always looking for solutions to make effective decisions. Specialist in data mining, pattern analysis, text classification and machine learning. With a strong database and operating systems management background.
With the ability to adapt to change, a great teammate, with leadership skills and always motivated to take on new challenges, always with great communication and a good work environment.

EDUCATION

Dec. 2021 (Expected)

M.S. in Electrical Engineering

División de Ingenierías Campus Irapuato-Salamanca | Universidad de Guanajuato
Thesis Title: *"Automatic Fake News Detection in Online Media"*
Advisor: Dr. Juan Carlos Gómez Carranza
Co-advisor: Dr. Saskia Van Amerogen

Dec. 2018

B.S. in Computer Systems Engineering

División de Ingenierías Campus Irapuato-Salamanca | Universidad de Guanajuato
Thesis Title: *"Age and Gender Identification in Pinterest Through User-Generated Images and Text"*
Advisor: Dr. Juan Carlos Gómez Carranza

WORK EXPERIENCE

Jul. 2018 – Dec. 2018

Back-End Web Developer Jr.

CCSistemas Desarrollo Digital

- Implementation of different information systems based on a web platform.
- Creation of various modules using the PHP programming language for different information systems.
- Support to various information systems for optimal operation.
- Manipulation of databases using MySQL.

PROJECTS

Nov. 2017 – Dec. 2018

Design an Implementation of Search Methods by Similarity for Users of Social Media

Fondo Sectorial CONACYT-INEGI, project number: 290910

- Data collection from the Pinterest website using a scraper to extract the pins, which are the form of communication between the users of this social network. The scraper collected images and text from the website.
- Extraction of different superficial features from the text such as words, emojis, hashtags (#), ats(@), etc. With the visual content, a neural network ResNet-50 was used to extract the features from the images.
- Implementation of different machine learning models such as Support Vector Machine, Logistic Regression, Random Forest, etc. These models were combined with the data collected for the prediction of demographic variables.
- Development of an API using Flask and in a combination of different pre-trained machine learning models. The user can paste text or upload it to predict different demographic variables. The same process can be done with images.

LANGUAGES

• **Spanish - Native** • **English - C1** • **Italian - Elementary**

SOFTWARE

Python	C/C++	SQL	Matlab
PHP	HTML	Javascript	R

TECHNICAL SKILLS

- Machine Learning and Deep Learning libraries (Tensorflow, Keras, scikit-learn, NumPy and Matplotlib).
- Database manipulation (MySQL, Microsoft Server and Oracle).
- O.S. management (macOS, Linux and Windows).

CERTIFICATIONS

Computer Science and Programming

MIT* | *License: 7aadf932eb1439bac4cfc7fed7ab1f

Data Science

UNAM* | *License: 92N22S3NVF52

JOURNAL REVIEWER

- IEEE Transactions on Pattern Analysis and Machine Intelligence, 2021

JOURNAL PAPERS

- Gomez, J. C., **López-Santamaría, L. M.**, Ibarra-Manzano, M. A. & Almanza-Ojeda, D. L. (2021). Predicción automática del nivel educativo en usuarios de Twitter en México. *Realidad, Datos y Espacio. Revista Internacional de Estadística y Geografía, 12(1)*, (pp. 48-61). **https://bit.ly/3y18Xxe**.

CONFERENCE PAPERS

- **López-Santamaría, L. M.**, Gomez, J. C., Almanza-Ojeda, D. L., & Ibarra-Manzano, M. A. (2019). Age and gender identification in unbalanced social media. In *2019 International Conference on Electronics, Communications and Computers (CONIELECOMP)* (pp. 74-80). IEEE.
